Release B HP-UX 10.10 Patch List for Series 800 Machines

This list is valid ONLY for HP series 800 machines running HP-UX 10.10

Report Date: 1/30/97

 - Bundle PB_02_800_1010 is the HP General Release Patch Bundle for series 800 machines running HP-UX 10.10, and patches that appear in this bundle are indicated by an X in the "PB_02_800_1010" column.

 - Bundle PB_01_800_1010 is the Hardware Enablement/Critical Patch Bundle for series 800 machines running HP-UX 10.10, and patches that appear in this bundle are indicated by an X in the "PB_01_800_1010" column. The intent of this bundle is to correct data corruption problems and provide support for new peripherals.

Shaded column indicate patch category :
  C = Core; *installed on all machines*
  A = Application dependent; install where needed

  H = Hardware dependent; install where needed
  O = Other; install where needed

Installation Notes:

> If patches exist already on system, be sure to use /usr/sbin/swremove to remove ALL patches that do not appear in this baseline BEFORE installing these. If this is not done, many of these patches will fail to load because swinstall will determine that a newer successor patch is already loaded.
